Summary

Automation QA Engineer with over 3.2 years of experience in both automation and manual testing. Holds a Master's degree in Computer Applications (MCA), providing a strong technical foundation. Skilled in managing multiple projects efficiently while maintaining high-quality standards. Currently expanding expertise in DevOps practices, including tools like Jenkins, Docker, and pipeline automation to enhance testing efficiency and delivery speed. Possesses excellent interpersonal and communication skills, with the ability to collaborate effectively in multi-time zone, multi-region, and multi-cultural environments.

Technical Skills

Automation Testing: Selenium WebDriver, TestNG, Cucumber, Maven, Jenkins, Gherkin, Extent Reports, XPath, Data-Driven Testing, Behavior-Driven Development (BDD), Hybrid Framework Design.

Manual Testing: Test Plan Creation, Test Case Design, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, UAT, Black Box Testing, Ad-hoc Testing, Exploratory Testing.

Programming Languages: Java.

API Testing: Postman, JSON.

Version Control: Git, GitHub.

CI/CD Tools: Jenkins.

Project Management Tools: Jira, Zoho Sprints.

Cloud Platform: AWS - IAM, EC2, S3, VPC, RDS, DynamoDB, Lambda, CloudTrail, CloudFormation, Secrets Manager, Systems Manager.

DevOps & CI/CD: Jenkins (Pipeline), GitHub Actions, SonarQube.

Containerization & Orchestration: Docker, Kubernetes.

Infrastructure as Code: Terraform, CloudFormation.

Configuration Management: Ansible.

Monitoring & Logging: Prometheus & Grafana, CloudWatch.

Version Control: Git, GitHub.

Operating System: Linux

Experience

RateBotAi

Aug 2024 – Feb 2026

QA Engineer

Mumbai, India

- Designing, creating and implementing functional test cases related to modules.
- Single point of contact for QA activities, handling test planning, test execution, defect management and release validation independently.
- Executed **End-To-End Testing** across CMS (Channel Management System), PMS (Property Management System), and BMS (Booking Management System).
- Improved Test Coverage for critical workflows.
- Writing clear, concise, and comprehensive **test cases**.
- Automated regression test cases using **Java Selenium** integrated with **Cucumber** for BMS.
- Initiated **automation scripts** for **Regression testing**.
- Experienced in **defect reporting, tracking and management** using **Zoho Sprints**.
- Ensuring a bug-free and working software has been delivered, prepared **test cases** and performed **UAT testing**.
- Created and executed **API test cases** using **Postman** and validated JSON responses.
- Performed **functional, regression, smoke, sanity, and exploratory testing**.

Sigmasoft Infotech Pvt Ltd

Jan 2023 – Jul 2024

QA Engineer

Bangalore, India

- Working as both an **Automation and Manual Test Engineer** on the **HRMS tool**.
- Development of automation scripts using **Cucumber Java Selenium framework**.
- Automated 80+ test cases **reducing regression time by 60%**.
- Integrated Selenium automation framework with **Jenkins CI pipeline** for automated test execution.
- Configured **Jenkins jobs** using **Maven commands** to trigger **TestNG** test suites.
- Writing and executing **manual test cases** by understanding requirements and covering acceptance criteria.
- Built **Hybrid Framework** using **Selenium + TestNG + Cucumber**.
- In-depth knowledge of **SDLC** and **STLC** processes.
- Experienced in **defect reporting, tracking, and management** using **Jira**.
- Strong understanding of **Agile methodologies** and **Scrum practices**.

Projects

1 - Three-Tier Scalable Web Application Deployment on AWS using Terraform and CI/CD

Tools: AWS, Terraform, Jenkins, Docker, GitHub, Linux, Nginx

- Designed and deployed **AWS infrastructure** using **Terraform**, including **VPC**, **Subnets**, **NAT Gateway** and **Route tables**.
- Configured **Application Load Balancer** with **Auto Scaling EC2 instances** running **Nginx application**.
- Implemented secure database layer using **Amazon RDS** in a private subnet.
- Configured **Terraform** remote backend using **S3** and **DynamoDB state locking**.
- Built **CI/CD pipeline** in **Jenkins** to automate infrastructure provisioning and deployment.
- Containerized application using **Docker** and stored code in **GitHub**.

2 - Monitoring and Logging Setup for Kubernetes Cluster

Tools: Kubernetes, Docker, Prometheus, Grafana, AWS

- Deployed containerized applications on a **Kubernetes cluster** running on **AWS EC2**.
- Implemented monitoring solution using **Prometheus** and **Grafana** to track cluster and application metrics.
- Installed **Prometheus** using **Helm** and configured **Grafana dashboards** for real-time visualization.
- Monitored **pod health**, **CPU utilization**, **memory usage** and **cluster performance**.
- Used **kubectl** and **Helm** for **Kubernetes** resource management.

Education

Master of Computer Applications

Bharati Vidyapeeth, Navi Mumbai Affiliated to University of Mumbai

Jun 2021 – Jul 2023

Bachelor of Science in Information Technology

Mulund College of Commerce, Mumbai Affiliated to University of Mumbai

Jun 2018 – May 2021

Languages

English, Hindi, and Marathi
